Full Stack Developer

I am writing to express my interest in the Full Stack Developer opportunity. With 1 year of professional experience in modern web development and a strong foundation in JavaScript-based technologies, I am eager to contribute to building scalable and efficient applications within your organization.

Over the past year, I have worked as a Full Stack Developer, gaining hands-on experience in designing and developing web applications using technologies such as Next.js, React.js, Node.js, Fabric.js, Firebase, and REST APIs. My experience includes building reusable frontend components, implementing authentication and real-time features, and developing responsive and user-friendly interfaces.

One of my key contributions involved developing a dynamic template creation canvas using Fabric.js for an admin portal, enabling interactive document template customization. I have also worked extensively with Firebase services and Google Cloud Platform for managing backend functions and application workflows. Additionally, I contributed to dashboard development and analytics features for production applications.

Through these experiences, I have gained practical exposure to production systems, Git-based collaboration workflows. I enjoy solving real-world problems through technology and continuously improving my skills in full-stack application development. I would welcome the opportunity to bring my technical expertise, enthusiasm, and problem-solving mindset and contribute to impactful projects.

Thank you for your time and consideration. I look forward to the opportunity to discuss my application further.

Best Regards,

Shiva Subramaniyam S
