OBJECTIVE

Full Stack Developer with 1 Year of industry experience building scalable web applications using React.js, Next.js, Node.js, Vue.js, and Firebase. Experienced in REST API integration, real-time systems, and cloud-based serverless architectures using Google Cloud Platform. Passionate about building performant applications and solving complex engineering problems.

EDUCATION

Bachelor of Engineering - Computer Science Engineering

Jyothy institute of technology (VTU)

CGPA: **9.26** | Graduated: **June 2025**

Jyothy kendriya vidyalaya (2nd PUC)

Percentile - **90.5%** | **June 2021**

Vasavi Educational Trust (SSLC)

Percentile - **85.7%** | **May 2019**

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python.

Frontend: HTML, CSS, ReactJS, Vue.js, NextJS.

Backend: NodeJS, FastAPI.

Databases: Firebase, MongoDB.

Software Tools: VS code, Postman, Git, Firebase Console.

Cloud: Google Cloud Platform (GCP).

Concepts: REST APIs, Authentication, Responsive Design.

Operating systems: Windows, Ubuntu.

PROFESSIONAL EXPERIENCE

Web Developer — TrustGrid (June 2025 – Present) | Full Time

- Designed, developed, and maintained scalable web applications using **Next.js, React.js, and Node.js**, ensuring high performance and responsiveness.
- Implemented reusable frontend components and integrated backend services for the **TrustGrid SSI Project**, improving development efficiency and user experience.
- Contributed to Synq Social QA project, focusing on testing workflows and feature validation.
- Integrated REST APIs, authentication flows, and real-time features.
- Collaborated with cross-functional teams using Git-based workflows and Agile practices.
- Improved UI responsiveness, reducing page load time by ~30% through React component optimization.
- **Developed a dynamic canvas-based template editor using Fabric.js**, enabling interactive template creation and real-time communication for document customization in the Super Admin portal.
- **Provided key inputs and improvements during the Table PR implementation**, contributing to better UI structure and usability.

PROJECTS

Admin Dashboard & Analytics System

August 2025

- Built a production-ready admin dashboard using Vue.js, Firebase, and Node.js for real-time analytics.
- Designed serverless backend using Firebase (Auth, Firestore, Cloud Functions).
- Implemented real-time tracking system for user behavior and operational metrics.
- Managed deployment and monitoring via GCP, improving system reliability.

ACADEMIC PROJECTS

Payroll Management System

April 2024

- Built a payroll management web application using HTML, CSS, JavaScript, PHP and MySQL.
- Implemented CRUD operations for employee salary management.
- GitHub Link- https://github.com/shivasubramaniyam/PayrollManagementSystem_DBMS

Student attendance System using Facial Recognition

Aug 2024

- Developed a facial recognition-based attendance system using **Python and the face_recognition library** to automatically record student presence via webcam.
- Implemented automated attendance capture and integrated the system with a database for attendance tracking.
- GitHub Link- https://github.com/shivasubramaniyam/mini_project.git

Blind Assistance using AI/ML for People with Disabilities

May 2025

- Built an **AI-based navigation assistance system** for visually impaired users using **Python and OpenCV** for object detection.
- Implemented **speech synthesis** to provide real-time audio feedback for detected objects and navigation cues.

CERTIFICATIONS AND ACHIEVEMENTS

- | | |
|---|----------|
| • Introduction to SQL. | Feb 2024 |
| • React-JS beginner level. | Dec 2023 |
| • Python for everybody-L1, L2. | Feb 2023 |
| • Participation in ENIGMA 1.0 conducted at JIT | Nov 2023 |
| • Contributed to Fabric.js community discussion regarding table implementation improvements.
