PROFESSIONAL SUMMARY

Full Stack Developer with experience in building high-performance web applications using **React.js**, **Next.js** and **Node.js**. Proven track record in developing interactive canvas tools, optimizing frontend performance by **30%**, and implementing serverless workflows on **GCP & Firebase**.

EDUCATION

Bachelor of Engineering - Computer Science Engineering

Jyothy Institute of Technology (VTU)

CGPA: **9.26** | Graduated: **June 2025**

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, CSS3/Tailwind

Frontend: React.js, Next.js, Vue.js, Fabric.js

Backend & APIs: Node.js, RESTful APIs, Firebase Auth/Functions

Databases & Cloud: PostgreSQL, MongoDB, Firebase Firestore, Google Cloud Platform (GCP)

Developer Tools: Git, Postman.

PROFESSIONAL EXPERIENCE

Full Stack Developer — TrustGrid (June 2025 – Present) | Full Time

- Architected an interactive, canvas-based template editor using **Fabric.js** and **real-time state synchronization**, streamlining document customization within the Super Admin portal.
- Migrated legacy **Create React App (CRA) codebase to Vite**, optimizing build configurations and reducing development server startup and HMR (Hot Module Replacement) build times across the application.
- Optimized core React/Next.js UI components through code-splitting and memoization, reducing initial page load time by **~30%**.
- Implemented reusable frontend components and integrated backend services for the **TrustGrid Self-Sovereign Identity (SSI) Project**, improving development efficiency and user experience.
- Spearheaded end-to-end QA and feature validation for **Synq Social**, authoring test workflows that increased release stability.

PROJECTS

Admin Dashboard & Analytics System

August 2025

- Built a production-ready admin dashboard using Vue.js, Firebase, and Node.js for real-time analytics.
- Designed serverless backend using Firebase (Auth, Firestore, Cloud Functions).
- Implemented real-time tracking system for user behavior and operational metrics.
- Managed deployment and monitoring via GCP, improving system reliability.

Blind Assistance using AI/ML for People with Disabilities

May 2025

- Built an **AI-based navigation assistance system** for visually impaired users using **Python** and **OpenCV** for object detection.
- Implemented **speech synthesis** to provide real-time audio feedback for detected objects and navigation cues.

Student attendance System using Facial Recognition | [Link](#)

August 2024

- Developed a facial recognition–based attendance system using **Python and the face_recognition library** to automatically record student presence via webcam.
- Implemented automated attendance capture and integrated the system with a database for tracking.

CERTIFICATIONS

- Introduction to SQL -- Simplilearn.
- React-JS beginner level -- Simplilearn.

February 2024

December 2023

ACHIEVEMENTS

Fabric.js Core Community: Contributed to key UI structural and performance discussions regarding canvas table implementations. [\[Fabric.js Discussion #8310\]](#)

January 2026
